Team D Project Proposal

by Levi Schoen

Project Rankings

- Stevensis Inventory Management

- Conway Time Card UI

- eLearning Platform

- Real Estate Decision Web App(tie)

- Navex Global Carpooling App(tie)

- Firefox OS App

- S-Store

Team D Goals

- Resume/Portfolio Material

- Experience with industry practices and working with a team to build a project

- Choose something we are confident we can implement

- Potentially gain new language and framework skills

Choice #1

- Stevensis Inventory Management

- Clear cut top choice

- Well defined scope

- Reasonable project to complete in the given timeframe

- Several team members with strong database skills

#2

- Conway Time Card UI

- Clear scope

- Reasonable project to complete in our time frame

#3

- eLearning Platform

- The chance to have a meaningful and positive impact on other people's life

- Creative lee-way and project flexibility: a variety of sub tasks that we could choose from

#4

- Real Estate Decision Web App

- Clear scope and requirements

- High confidence we can complete this project in the given time frame

#5

- Navex Carpooling App

- Chance to build software from the ground up, backend and front end

- Flexibility to choose platform and language that we want

- Clear scope

#6

- High visibility company-would look good in our portfolios

S-Store

- We don't dislike it

Bottom 3

- Curated Docker-too complex of a problem for the time frame, the presenter seemed very intent on monetizing the product without reimbursing us for our efforts.

- Simultaneous Wiki-same as above

- Spontaneous saving app-The use case and concept of the app seemed far-fetched
